

The following table contains a single row that can be duplicated. The duplicated rows can then be edited by the PHPWord_Template class. You just can edit single-line of text elements. The format and the rest of the document stay untouched.

You just have to use the PHPWord search pattern like `${myReplacedValue}`.

Value 1:	Sun
Value 2:	Mercury
Value 3:	Venus
Value 4:	Earth
Value 5:	Mars
Value 6:	Jupiter
Value 7:	Saturn
Value 8:	Uranus
Value 9:	Neptun
Value 10:	Pluto

Or you can use complex tables like these:

1	Name	Taylor
	First name	James
	Phone	+1 428 889 773
2	Name	Bell
	First name	Robert
	Phone	+1 428 889 774
3	Name	Ray
	First name	Michael
	Phone	+1 428 889 775

Today is Sunday. Thanks for reading.
